

STEP 02 – ACCESS

LET'S GET CONNECTED.

Thanks for completing onboarding. To start building, we need access to a few platforms — most of them you probably already have. The faster you share access, the faster we ship.

WHAT WE NEED

Access Checklist

Below is everything we need access to in order to build, integrate, and optimize. Skip what doesn't apply to you. If you don't have one of these set up yet, tell us — we'll handle creation in many cases.

Website & Infrastructure

- ☐ Website CMS Admin
WordPress / Webflow / Shopify / etc. — add hello@number1digitalmarketing.com as Admin or Editor.
- ☐ Hosting Account
WP Engine / Kinsta / SiteGround / etc. — share via secure vault or add as collaborator.
- ☐ Domain Registrar
GoDaddy / Namecheap / Cloudflare Registrar — read-only DNS access is fine for V1.
- ☐ Cloudflare or CDN
If used — add us as a member with appropriate permissions.

Analytics & Search

- ☐ Google Analytics 4
Add hello@number1digitalmarketing.com as Editor at the property level.
- ☐ Google Search Console
Add as Owner (Settings → Users & Permissions).
- ☐ Google Tag Manager
Add as Editor or Admin on the container.
- ☐ Microsoft Clarity / Hotjar
If used — invite us as collaborators.

Advertising Accounts

- ☐ Google Ads
Send us your Customer ID (top-right of Google Ads). We'll send a link request — accept it.
- ☐ Meta Business Manager
Add our Business as a Partner under Settings → Partners → Add → enter our BM ID. We'll send it.

☐ LinkedIn Campaign Manager
Add hello@number1digitalmarketing.com as Account Manager.

☐ TikTok Ads Manager
Send us your Advertiser ID — we'll send a partner request.

Marketing Tech & Communication

☐ Email Platform (Mailchimp / Klaviyo / ActiveCampaign / etc.)
Add hello@number1digitalmarketing.com as Admin.

☐ CRM (HubSpot / Salesforce / Pipedrive / etc.)
Add as user with appropriate role — at minimum, contact + deal read/write.

☐ Slack / Teams
Invite hello@number1digitalmarketing.com to a shared channel — we recommend a dedicated client channel.

☐ Calendar / Calendly / Cal.com
Share booking links or grant scheduler access where relevant.

Social Media (read-only is fine; we may request edit access later)

☐ Instagram (Meta Business Manager)
Assign the page to your BM, then add us as Partner.

☐ LinkedIn Company Page
Add as Content Admin or Super Admin.

☐ TikTok / X / YouTube
Add hello@number1digitalmarketing.com as a manager where supported.

HOW TO SHARE CREDENTIALS — SECURELY

Security First.

We use 1Password for all client credentials. After you fill out the access checklist above, reply to our access email and we'll send you a 1Password shared vault link. You can share logins, API keys, and any sensitive credentials there.

Do not send passwords over email, Slack, or text. If you don't have 1Password, we'll provision a free invited user for you — no cost to you.

Every account we access is logged. We will use 2FA wherever supported. When our engagement ends, we audit and remove our access across all platforms.

NEED HELP?

Stuck on a specific platform? Reply to this email or message us in Slack. We've added access to 100+ accounts – we'll walk you through any platform you need help with.
